## SMG ANNOUNCES PARTNERSHIP WITH TALCURA

### INTEGRATED RECRUITMENT SOLUTION®

TORONTO - August 20th, 2008 - Manage all your recruitment activities with "one" integrated system, increase candidate flow while measuring the ROI of all your recruitment initiatives.

Self Management Group (SMG), a world leader in screening and selection tools announced a new strategic partnership with Talcura, a leading provider of on-demand e-recruiting and talent management solutions. This partnership will provide a fully Integrated Recruitment Management System and gives recruiting managers a versatile digital dashboard that will support both centralized and decentralized recruiting strategies.

Up until now, recruiting companies have been forced to rely on multiple vendors for their recruiting, screening and selection. Integrating each of these vendors' products into a single applicant tracking system has proven difficult and costly and finding one system that would adequately support both field and corporate recruiting models has been next to impossible. Finally, there is a solution.

### **Self Management and Talcura are pleased to announce the new, Integrated Recruitment Management Solution.**

"This new solution eliminates wasted time and allows the recruiting manager to integrate their entire recruiting, screening and selection efforts into a single, web based interface hence, increasing the speed and effectiveness of sourcing and hiring the best talent", said Sandra Jagmohan, President and CEO of Talcura.

"It will support recruiting managers in their efforts to get the most out of their human capital strategy from point of first contact through to retirement. High volume, de-centralized field recruiters and centralized corporate recruiters that use job requisitions can both take advantage of this system to quickly find and select the recruits they need. Finally, one product-one solution!", explained John Marshall Ph.D., President of Self Management Group.
